“ Today is the birthday of Hedwig F Nagle...

June 25th 2023, she would have been 98 years old today.

Deepest passion and love were given to her two sons which i am

one. Being 68 years old now i can easily reflect back to feel the

young man i was with such an inspirational mother who came to the

USA from the war torn Germany.

Her love of music and art gave us the foundry to build our lives on.

Her distaste for war and politics gave us more energy to develop

our taste for art and music.

I feel lucky to have such an exceptional upbringing with an

incredible woman that i called Mom.

💕 My heart beats and quivers until the day it stops. Her gift of love keeps me beating the drum of life with gusto. 🎵🎸
